

# Mercury

♩ = 144

*f*  
Mer - cu - ry, Mer - cu - ry, The

5

hot - test thing in space and yet as cool as can be.

9

*mf*  
Mer - cu - ry the mes - sen - ger with wings on his heels, Found that a - vi - a - tion was much

12

quick - er than wheels. Back on Mount Ol - ym - pus, he cut quite a dash,

15

Fly - ing round with mes - sa - ges as quick as a flash. Now you'll find him hang - ing out up

18

there in space, Spin - ning round the sun at an in - cre - di - ble pace.

21

Mer - cu - ry, — Mer - cu - ry, The hot - test thing in space and yet as

24

cool as can be. On

*mp*

27

Mer - cu - ry the years are short but days and nights long, To live up there you'd have to be e -

30

- nor - mous - ly strong. By day the sun is hot e - nough to melt down lead, At

33

night it gets so cold that you would drop down dead. Liv - ing on this pla - net would be

36

noth - ing less than tor - ture, Ev - ery night is gla - ci - al and ev - ery day's a scor - cher.
